EDUCATION

Arizona State University
PhD in Mechanical Engineering

August 2015 - May 2020
CGPA: 4.0/4.0

Indian Institute of Technology, Madras
B.Tech and M.Tech in Mechanical Engineering.

July 2009 - May 2014
CGPA: 7.89/10.00

RESEARCH EXPERIENCE

Neuromuscular Modeling of Human Ankle

August 2015 - May 2020

- Developed a neuromuscular model of the ankle using a robotic platform that would serve as a basis for lower limb exoskeletons and rehabilitation protocols
- Developed a robotic platform capable of simulating various environments and analyzing ankle behavior while humans interact with these environments.

Ankle Rehabilitation in Stroke Survivors

August 2018 - December 2020

- Conceptualized, implemented and validated a robotic training protocol aimed at improving paretic ankle motor control in stroke survivors.
- The 6 week study resulted in improvements in both the test subjects as observed in kinematic and clinical evaluations.

Flexible Robotic Endoscope for Cardiac Surgery

October 2014 - July 2015

- Developed the embedded system and control algorithm of a novel flexible endoscope designed for cardiac surgeries.
- The device is expected to reduce the recovery time and complexity of micro invasive cardiac surgeries.

Development of Motion Adaptation Device

May 2013 - May 2014

- Developing a device that can analyze, record and adapt human hand motion to different robotic systems.
- Demonstrated the utility of the system by successfully controlling a 6 DoF Robotic Arm.

Portable Gait Analysis and Rehabilitation System

May 2013 - May 2014

- Developed an economic device costing \$40 for gait rehabilitation in low income countries by implementing the embedded system and a learning algorithm for abnormality detection.

FIRA Robosoccer

May 2011 - May 2013

- Represented the country and Led a Team of 11 members at FIRA, an International Robosoccer competition by leading the development of a multi-agent system including embedded systems, controllers and decision making algorithms

TECHNICAL EXPERTISE

Embedded Systems	STM32,ATMEL,Simulink Real Time Systems,RTOS
Software	Solidworks, EAGLE, SIMULINK, MATLAB, LabVIEW
Languages	C,C++,Python

V. Nalam and H. Lee, "Development of a multiple axis robotic platform for ankle studies," in *ASME 2016 Dynamic Systems and Control Conference*, American Society of Mechanical Engineers Digital Collection, 2016.

V. Nalam and P. Manivannan, "Development of a contact based human arm motion analysis system for virtual reality applications," in *Applied Mechanics and Materials*, Trans Tech Publ, vol. 592, 2014, pp. 2139–2144.

ACADEMIC ACHIEVEMENTS

- Awarded Outstanding Research Award for work on improving ankle motor control in patients affected by stroke by Graduate and Professional Student Association, ASU (2019).
- Best student paper at IEEE International Conference on Ubiquitous Robots, 2018.
- Awarded the ASU Athletics Research Grant for research on neuromuscular analysis of the human ankle (2018-2019).

LEADERSHIP ROLES

Co-founder, Sol Robotics

October 2019 - May 2020

- Co-Founder and technical lead for an early stage robotic venture incubated at Intel
- Part of a 4 member team which was selected into the final 8 out of 600 potential ventures

GPSA Assembly Member and Engineering Committee Chair

April 2018 - February 2020

- Elected to represent IRA Fulton Schools of Engineering as an assembly member in the graduate student government at ASU.
- Founded Engineering committee to better serve graduate engineering students and advocate for mental wellness initiatives for PhD students.

Research Engineer at SINAPSE, National University of Singapore

October 2014- July 2015

- The lead controls engineer for multiple robotic surgical devices in a team comprising of surgeons, engineers and designers.
- Developed a novel control mechanism that can be intuitively learned by surgeons with minimal training while mentoring 4 undergraduate interns.

CFI Administration and Student Relations Core

2011 - 2014

- CFI is a student run initiative which nurtures technical creativity and provides the necessary guidance and resources for the students of IIT Madras to pursue their endeavors in engineering.
- Coordinated a 3 phase strategy which increased the number of successful student driven innovative projects from 5 to 12 in 2014.

EXTRACURRICULAR ACTIVITIES

- Volunteered at ASU Rehabilitation Robotics Workshop and ASU Southwest Robotics Symposium, which is a platform for showcasing robotics research at ASU. (2016-2018)
- Volunteered as a student panelist at the International Students Orientation, to help international students get acclimatized to the university. (2017)
- Volunteered at the Carnival for MS, organized in Tempe for spreading awareness about Multiple Sclerosis. (2017)
