

VARUN NALAM

(+1)919-948-9696 ◇ varunnalam@gmail.com

EDUCATION

Arizona State University
PhD in Mechanical Engineering

August 2015 - May 2020
CGPA: 4.0/4.0

Indian Institute of Technology, Madras
B.Tech and M.Tech in Mechanical Engineering.

July 2009 - May 2014
CGPA: 7.89/10.00

RESEARCH EXPERIENCE

Neuromuscular Modeling of Human Ankle

August 2015 - May 2020

- Developed a multi-axial robotic platform to facilitate neuromuscular analysis of human ankle.
- Developed a neuromuscular model of the ankle to facilitate rehabilitation of patients affected by neurodegenerative disorders such as Stroke and Multiple Sclerosis.

Flexible Robotic Endoscope for Cardiac Surgery

October 2014 - July 2015

- Developed the embedded system and control algorithm of a novel flexible endoscope designed for cardiac surgeries.
- The device is expected to reduce the recovery time and complexity of micro invasive cardiac surgeries.

Development of Motion Adaptation Device

May 2013 - May 2014

- Developing a device that can analyze, record and adapt human hand motion to different robotic systems.
- Demonstrated the utility of the system by successfully controlling a 6 DoF Robotic Arm.

Portable Gait Analysis and Rehabilitation System

May 2013 - May 2014

- Developed the Embedded system, software and intelligence for an economic portable Gait analysis system
- The patented device is targeted to be used in low income countries for rehabilitation and is designed to be produced under \$40.

FIRA Robosoccer

May 2011 - May 2013

- Represented the country and Led a Team of 11 members at FIRA, an International Robosoccer competition.
- Contributed to various aspects of the team including decision making in multi agent systems, vision, embedded systems and Control.

TECHNICAL EXPERTISE

Embedded Systems
Software
Languages

STM32, ATMEL, Simulink Real Time Systems, RTOS
Solidworks, EAGLE, SIMULINK, MATLAB, VICON, MOTIVE
C, C++, Python

JOURNAL PUBLICATIONS

V. Nalam and H. Lee, “Development of a two-axis robotic platform for the characterization of two-dimensional ankle mechanics,” *IEEE/ASME Transactions on Mechatronics*, vol. 24, no. 2, pp. 459–470, 2019.

L. Hennington, V. Nalam, M. C. Eikenberry, C. L. Kinney, and H. Lee, “Visuomotor ankle training on a stiffness-controlled robotic platform improves ankle motor control and lower extremity function in chronic stroke survivors,” *IEEE Transactions on Medical Robotics and Bionics*, vol. 1, no. 4, pp. 237–246, 2019.

TEACHING EXPERIENCE

Fall, 2017 : **MAE 318:** Dynamic Systems and Controls , Teaching Assistant , ASU

Spring, 2014 : **ME 3280:** Mechanical Engineering Lab II , Teaching Assistant , IIT, Madras

Fall, 2013 : **ME 3270:** Mechanical Engineering Lab I , Teaching Assistant , IIT, Madras

LEADERSHIP ROLES

Co-founder, Sol Robotics

October 2019 - May 2020

- Co-Founder and technical lead for an early stage robotic venture incubated at Intel
- Part of a 4 member team which was selected into the final 8 out of 600 potential ventures

GPSA Assembly Member and Engineering Committee Chair

April 2018 - February 2020

- Elected to represent IRA Fulton Schools of Engineering as an assembly member in the graduate student government at ASU.
- Founded Engineering committee to better serve graduate engineering students and advocate for mental wellness initiatives for PhD students.

Research Engineer at SINAPSE, National University of Singapore *October 2014- July 2015*

- The lead controls engineer for multiple robotic surgical devices in a team comprising of surgeons, engineers and designers.
- Developed a novel control mechanism that can be intuitively learned by surgeons with minimal training while mentoring 4 undergraduate interns.

CFI Administration and Student Relations Core

2011 - 2014

- CFI is a student run initiative which nurtures technical creativity and provides the necessary guidance and resources for the students of IIT Madras to pursue their endeavors in engineering.
- Coordinated a 3 phase strategy which increased the number of successful student driven innovative projects from 5 to 12 in 2014.

Team leader for ROBOCON 2011 IIT Madras team

2010 - 2011

- Led a team of 22 members in a national level robotic competition held by Asia-Pacific Broadcasting Union and placed 5th out of a group of 56 teams.

EXTRACURRICULAR ACTIVITIES

- Awarded the best student paper at Ubiquitous Robotics Conference, Hawaii. (2018)
- Volunteered at ASU Rehabilitation Robotics Workshop and ASU Southwest Robotics Symposium, which is a platform for showcasing robotics research at ASU. (2016-2018)
- Volunteered as a student panelist at the International Students Orientation, to help international students get acclimatized to the university. (2017)
- Volunteered at the Carnival for MS, organized in Tempe for spreading awareness about Multiple Sclerosis.(2017)
- Organized an orientation session for Indian Graduate Students on approaching academics and research at ASU. (2017,2018)
